Skills

Languages: Php, Javascript, C#, SQL

Frameworks: Phalcon, React, Laravel

Other: MongoDB, Eloquent, Git, design patterns, Composer, npm, Redux, Bootstrap, Blade

Experience

Backend Developer – SZGYF

2022.04 – Present

- Developing and integrating backend features written in PHP, using an internally developed ORM and framework based on Phalcon.
- The database layer had both MongoDB and MariaDb in the application, so i've gained experience using both SQL and NoSQL databases.
- My tasks included complete oversight of development process, from consulting with the customers to delivering the product.

Frontend Developer – Gurgely (project)

2021 (3 months)

- Most of my day to tasks were developing a SPA's frontend in Javascript using React. The application was a restaurant management tool with NodeJs backend.
